

# WHEN THIS BUBBLE POPS – THEN WHAT WILL THE LUCIFERIAN BANKSTERS DO?

By Stephen R. Renfrow  
17 March 2017

The U.S. dollar index is a basket of other currencies weighted in ratios, as follows.

- Euro (EUR), 57.6%
- Japanese yen (JPY) 13.6%
- Pound sterling (GBP), 11.9%
- Canadian dollar (CAD), 9.1%
- Swedish krona (SEK), 4.2%
- Swiss franc (CHF) 3.6%

So, where is the value of the U.S. Dollar charted? It is not. What is the true value? That question refers to your faith that it exist as having any value! Here is a Long Term chart showing effects of major events on the “index” since 1967.

As you can plainly see on the Long Term Chart, the TREND is down. The below chart is a Weekly chart of the U.S. Index. It shows a recent change in direction after having gone sideways to slightly down for almost two years. The 100 and 50 Moving Averages held in the last half of 2016 for a slight pop! Now it is indicative of a 123 Top formation, and moving down again. If it breaks below the 50/100 Moving Averages (MA) it should continue to crash. This is not the doings of Pres. Trump. This has been artificially inflated and manipulated by the Federal Reserve Corp.(FRC) and the “Rich Men of the Earth” (whom I name in my PSP book) who control it.

Weekly Major SELL Signal occurred at Christmas 2016.

The XBD represents the Wall Street gang who operate above the law, above reproach, at the behest of the U.S. Government, led by Goldman Sachs whose “GS” stock is a component of the XBD index. The implosion of mortgage bonds and their overloaded over-leveraged damaged Collateralized Debt Obligation (CDO) bonds is the bane of the broker dealers, if not the entire banking system. Still, perhaps 50% or more of all bank sector assets are linked either to mortgage portfolios or their mortgage bonds. The broker dealers are up to their necks in fast falling asset-backed bonds - again.

The XBD chart below shows topping action after Divergence with the CCI (see bottom of chart), a sure precursor to a reversal in direction. So we (the investors) are watching for a Reversal Down very soon. There was a Weekly Major SELL Signal 2<sup>nd</sup> week of Feb. 2017.

The Broker Dealers sit at the nexus of the massive asset-backed bond 'con game' perpetrated upon the nation and the world. Revenge should be doled out to this crowd by the Trump Admin. We the People, should not only hope and pray, but should also send him and congress a message.

The BKX, below, is is the broad, 'insider', Bank Stock Index (with adjoining brokerage functions). It serves as the lead indicator of financial distress. The current chart also gives confirmation of what is stated herein. That is ... get ready for a BIG CRASH. It also shows Divergence and Topping action. The last time these charts showed this kind of action was mid 2007 – Yep, right before the previous Bubble popped at the end of 2007.

Again, I have written extensively at my site ([www.NMT-PSP.com](http://www.NMT-PSP.com)) regarding the FACT most all nations, led by the BRICS nations, are not doing business using the U.S. Dollar as they no longer accpet it as a valid currency. They see the writing on the wall. While the U.S. Gov't openly admits to being \$20 Trillion in debt, including their unfunded liabilities brings it upto \$120 Trillion. No sovereign state wishes to take on that risk. They know the U.S. Gov't is BANKRUPT, thanks to the Congress who sold out to the International Luciferian Bankster Cabal and their Illuminati Masters.

Repeat after me ... **NO MORE BAILOUTS! AND – NO BAILINS EITHER!!!**

More confirmation is given by the reaction in the XAU – Gold & Silver Index below, where it took off in January 2016 and has broken above the 50 & 100 Moving Averages. Recently retesting and reversing off the 100 MA is very strong Bullish move. So while the USD, the Federal Reserve Corp. (FRC) and Wall Street are busy propping up their markets, the world over is moving back into Gold. I have also written extensively, posting on my webste, that countries and banks have been busy buying up every bit brought up out of the ground. Meanwhile, JP Morgan Chase, the Biggest Criminal Bankster Organization, continues to SHORT the precious metals markets at the COMEX. When they are unable to deliver to the ones holding Long positions and demand their Profit in Gold, that house of cards will collapse as well, and may that conglomerate monopoly game burn in hell.

My interpretation is that the banking stock index breakdown leads the process, and assures a much more painful decline in the XBD index. The XBD breakdown is what the gold community will exploit, since the insiders have so much influence, if not direct control, through immediate participation, with the U.S. Gov't and Federal Reserve Corp. management.

Now notice the DRV Wkly chart below, which is 3x or three times Bearish Real Estate. It seems to be making a classic Reverse Head & Shoulders Bottom. It may dip a little more in the coming Summer Season and the market heats back up somewhat, but I doubt very seriously it will be like 2016. The recent low of 10.95 is close to the July 2016 Low of 10.45. Any closer maybe considered a Double Bottom, indicating a Big Move higher. Watching for a Break above the 18/50 MA.

I don't believe this Report would be complete without showing the S&P 500 (see below). Notice there is also Divergence between the higher index versus the CCI at bottom of chart, and that the Stochastic indicator above it has turned down, while the MACD above it is topping out. A sure precursor to another Reversal and a BIG Move downward.

Can You Say "Irrational Exuberance" boys and girls !?!?!

According to my Monthly Chart, the next "correction" is now almost 2 years past due. As Bear Moves usually last approximately 2-2.5 years, while Bull Moves last 7 years. So, 2008 + 7 = 2015.

The following cyclically adjusted price-to-earnings ratio Chart, aka CAPE, or Shiller P/E, is a valuation measure usually applied to the US S&P 500 equity market. It is defined as price divided by the average of ten years of earnings (moving average), adjusted for inflation. As such, it is principally used to assess likely future returns from equities over timescales of 10 to 20 years, with higher than average CAPE values implying lower than average long-term annual average returns. It is not intended as an indicator of impending market crashes, although high CAPE values have been associated with such events.<sup>1</sup>

### Cyclically Adjusted Price-to-Earnings Ratio

Note that it is as high as it was in 1929, currently 28.93.

It has been found that the lower the CAPE, the higher the investors' likely return from equities over the following 20 years. The average CAPE value for the 20th century was 15.21; this corresponds to an average annual return over the next 20 years of around 6.6 per cent. CAPE values above this produce corresponding lower returns, and vice versa.

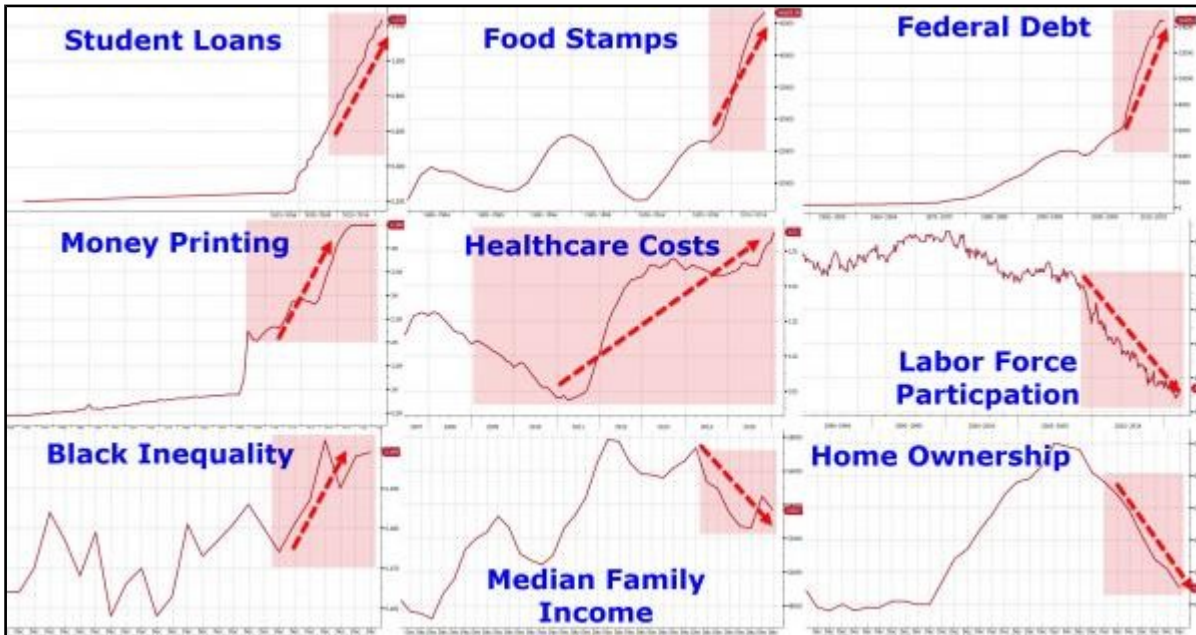

In 2014, economist Robert Shiller expressed concern that the prevailing CAPE of over 25 was "a level that has been surpassed since 1881 in only three previous periods: the years clustered around 1929, 1999 and 2007. Major market drops followed those peaks". Shiller popularized the 10-year version of Graham and Dodd's P/E as a way to value the stock market. He shared the Nobel prize in 2013 for his work in the empirical analysis of asset prices.

On the next page is another interesting Chart for you – actually 9 different charts. They are simple, but should nevertheless be self evident as to what's been happening.

<sup>1</sup> Source: [www.wikipedia.org](http://www.wikipedia.org)

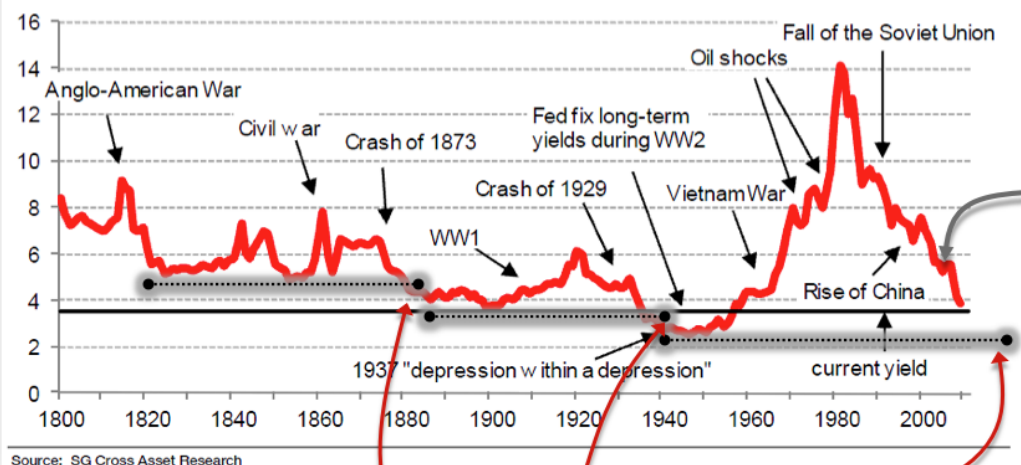

Lets call this group of charts .... **OBAMANOMICS**.

The chart below shows what has happened in the **BOND Market**.

**Two hundred years of US government bond yields (year end %)**

Greenspan comments on *The Conundrum* in bond yields

Each long term cycle broke the previous cycle low

Below are the Price Targets for Copper. Once it breaks out of the “sideways” Channel shown herein, Gold & Silver will soon follow. Copper will breakout either because of some country’s huge demand – or - a shortage due to mining concerns – or - both.

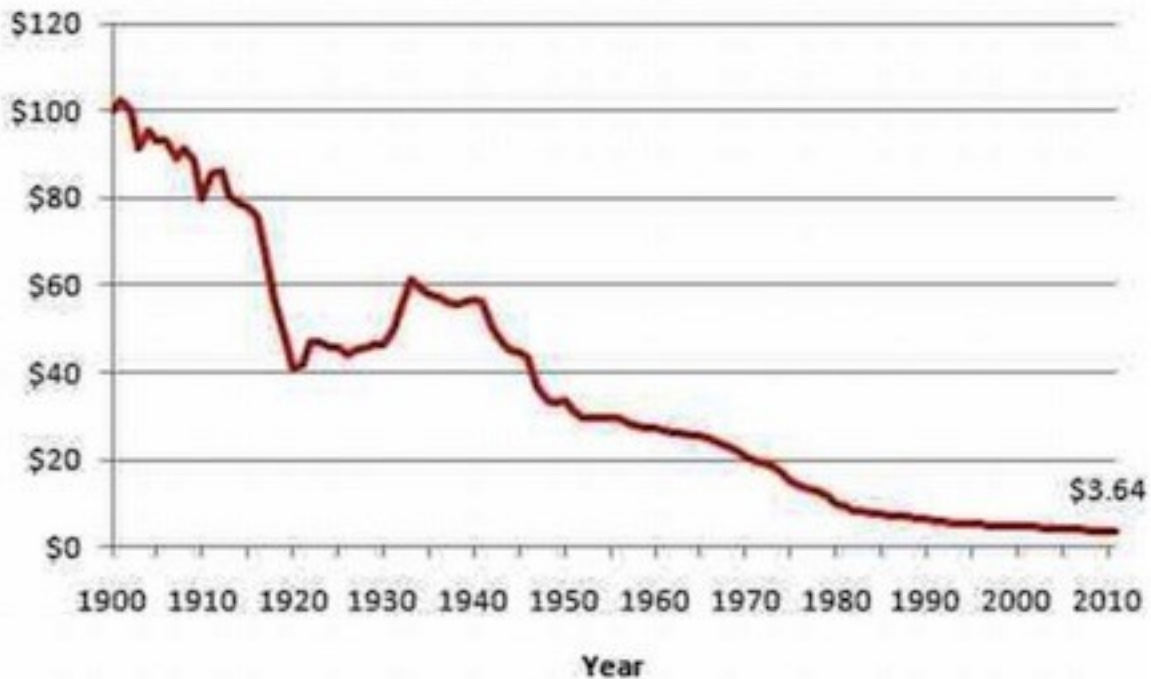

As you can see at the top of the next page, the U.S. Dollar Index is projected lower, showing the downside Price Targets. This would indeed carry the Index below the 50 and 100 day Moving Averages.

The massive change in the trends revealed in this Special Report, are yet another reason why the mining shares are still under accumulation by strong hands. The smart money is buying while the mining shares are at an all-time historic low vs the gold price. Right now, Gold and Silver is highly discounted because of the FED manipulation in these markets. If you have not purchased any small bars, or rounds ... NOW is the time and perhaps the last time at these prices.

Below is an older Chart showing what has happened to the Purchasing Power of the Federal Reserve Corp. Note (FRNs) over time. This begs the question - "Can It Get Any Worse?"  
 Actually - Yes!

## Purchasing Power of U.S. Dollar

Source: Observations (ObservationsAndNotes.blogspot.com)

This chart compares the monthly percentage growth of the Federal Reserve balance sheet (U.S. Treasuries and Agency MBS) against the price of gold, since 2004 to Mar 2017. Notice how Gold has yet to “catch up”, due to manipulation of the market. (source both charts: MacroTrends.net)

### FED (FRC) Balance Sheet vs Gold Price

The below chart shows the ratio of the gold price to the St. Louis Adjusted Monetary Base back to 1918. The monetary base roughly matches the size of the Federal Reserve balance sheet, which indicates the level of new money creation required to prevent debt deflation. Previous gold bull markets ended when this ratio crossed over the 4.8 level. So, Get Ready for Another BULL Gold Market.

### GOLD to MONETARY BASE RATIO

# Pentagon preparing for mass civil breakdown

Social science is being militarised to develop 'operational tools' to target peaceful activists and protest movements

The Pentagon is funding social science research to model risks of "social contagions" that could damage US strategic interests. Photograph: Jason Reed/REUTERS

A US Department of Defense (DoD) research programme is funding universities to model the dynamics, risks and tipping points for large-scale civil unrest across the world, under the supervision of various US military agencies. The multi-million dollar programme is designed to develop immediate and long-term "warfighter-relevant insights" for senior officials and decision makers in "the defense policy community," and to inform policy implemented by "combatant commands."

Launched in 2008 - the year of the global banking crisis - the DoD 'Minerva Research Initiative' partners with universities "to improve DoD's basic understanding of the social, cultural, behavioral, and political forces that shape regions of the world of strategic importance to the US."

Among the projects awarded for the period 2014-2017 is a Cornell University-led study managed by the US Air Force Office of Scientific Research which aims to develop an empirical model "of the dynamics of social movement mobilisation and contagions." The project will determine "the critical mass (tipping point)" of social contagions by studying their "digital traces" in the cases of "the 2011 Egyptian revolution, the 2011 Russian Duma elections, the 2012 Nigerian fuel subsidy crisis and the 2013 Gazi park protests in Turkey."

Twitter posts and conversations will be examined "to identify individuals mobilised in a social contagion and when they become mobilised."

One would be wise to consider the contamination and ruin of seven areas of human existence (see below). Protection is with knowledge, prudence, resistance, and Gold & Silver investment.

- 1) AIR with chemtrails poisoning the very air we breathe and contaminating the ground,
- 2) WATER with fracking to the point water lights on fire, toxic chlorine and flouride,
- 3) FOOD with genetic modification programs creating FrankenFood,
- 4) MONEY with QE and its hyper monetary inflation,
- 5) VACCINES with laced viruses, mercury, and other debilitating agents,
- 6) ECONOMY with endless war and phony war on terrorism, and
- 7) SOCIETY with the Arab refugee influx bringing in the Third Jihad.

Moreover, something big is afoot in Shanghai, as the Chinese have changed the game suddenly. Formal meetings held at the Shanghai Gold Exchange are extremely indicative of a mood shift. Their reaction to the U.S. FED rate hike was immediate strong and firm. They must feel a big betrayal by the criminal Western bankster elite. And rightly so! An ultra-low bond yield and a lower FED Dollar value is a real toxic mix for U.S. Corp. Treasury Bonds held in reserve, inviting their response. Expect the path to the proposed Global Currency RESET to come with urgency. The jig is up, from the Chinese reaction in the gold market.

This next CRASH is bound to lead to massive inflation by the U.S. FED, but no one will buy their Treasury Notes because they know the U.S. can not pay up! A new precious metals backed currency must happen. But is there anything left in Ft. Knox? NO! FRC laid claim to it all as collateral.

The question everyone wants answered - "When will it happen?" Soon Mikey, soon!

Recently the FED Chair spoke again and raised the FRC rate by ¼ basis points (.25%). The move came as no surprise, however I was mildly amused by the verbiage that was used in describing the change. The Fed is moving into a more "aggressive stage of draining easy money from the system" and is now "rapidly" hiking rates. I suppose most people are left with the impression that the FED has the power and expertise to actually micromanage the \$20 trillion U.S. economy. Isn't that what at least partially got us into the current state of affairs to begin with? I also surmise that investors believe they can precisely predict the outcome of every move the FED heads make. The majority would be wrong!

Soon America will have to face its horrible crimes against humanity and the environment. Although U.S., so called, leaders should be held accountable, more so should their puppet masters be brought to justice for their mass conspiratorial genocide. The Satanic factor of the Luciferian Illuminati has emerged for all to see. They are indeed flaunting it in your face. If you're sticking your head in the sand – you will have mud on your face – or - more than likely a stormtroopers boot.

The world is witnessing high level conflicts as the Globalist are extremely frustrated and angered at Trump's election as well as his agenda. They may very well accelerate the demise of the Federal Reserve Corp. Note (aka incorrectly called the dollar) as well as the Stock Market and blame it all on the Trump Administration. Bear in mind, this CRASH was inevitable, no matter who is in office. I've been wrtiing about the Illuminati conspiratorial Plan and Agenda since the mid 1980's. All the pieces are coming together for the Biggest CRASH the World has ever seen.

Love, Peace,

And Justice for All
